

Wait Time Display

Displays time until next green

Displays Real-Time Signal Operation Messages to Motorists

The Wait Time Display provides drivers with a visual readout of the amount of time remaining before the next green indication. The system is ideal for long work zones with high Red Clearance times, as it informs drivers that they can expect a longer than average wait.

Wait time can be displayed either as an estimated value — “Up to 5 Mins” — or as a real-time countdown. In addition, custom messages can be programmed for flashing scenarios, telling drivers to seek an alternate route around the flashing signal.

The Wait Time Display is available in a compact 18” x 28” size, or a large 24” x 60” version, and can also be upgraded to allow for bluetooth connectivity.

Wait Time Display

SPECIFICATIONS

Size	18" x 28" / 24" x 60"
Screens	Up to 6 per message
Enclosure	NEMA 4, IP65 sealed
Power	12V

WAIT TIME DISPLAY FEATURES

- 2 operating modes: fixed time ("Up to xx Minutes Wait"), or real-time countdown
- Displays custom message in the event of signal fault
- Optional Bluetooth connection

OTHER AVAILABLE OPTIONS

PEDESTRIAN CROSSWALK SIGNALS | System can be configured with MUTCD-compliant pedestrian crosswalk signal indicators.

ADVANCED REMOTE MONITORING | Recieve text and/or email alert notifications of signal operation and battery voltage levels.

FLAGGER/PILOT CAR MODULE | Allows flagger or pilot car driver to control signal status with built in safeguards.

DRIVEWAY ASSISTANCE DEVICE | System can be configured with DAD indications for use on residential driveways.
